**Subject: Application for the Programmer Position**

Dear Sir or Madam,

I am pleased to submit my application for the programmer position within your organization.

I hold a bachelor's degree in computer science and have been working for the federal government since 2023, where I contribute to projects in **QA testing** as well as **development** (PowerApps, JavaScript, C# plugins, TypeScript). This experience has allowed me to build strong technical foundations and learn to operate in a structured and demanding environment.

Before starting my career in IT, I spent four years in a **management role** in the restaurant industry (First Assistant Manager at McDonald's). This experience helped me develop a strong sense of responsibility, team management skills, and the ability to work under pressure—qualities that I now apply to my IT projects.

Driven by new challenges and constantly seeking opportunities to learn, I am someone who highly values continuous growth and enjoys taking on stimulating assignments. Curious, resourceful, and determined, I am confident that my combination of technical and interpersonal skills will allow me to make a positive contribution to your team.

I would be delighted to bring my energy and expertise to your projects. Thank you for considering my application. I remain available for an interview to further discuss how I could contribute to your objectives.

Yours sincerely,

**Joanie Pelletier**
